

## OUR MISSION

To consistently be a leading contractor in concrete construction, continually striving for improvement, and always pursuing new innovations.

## OUR PRINCIPLES

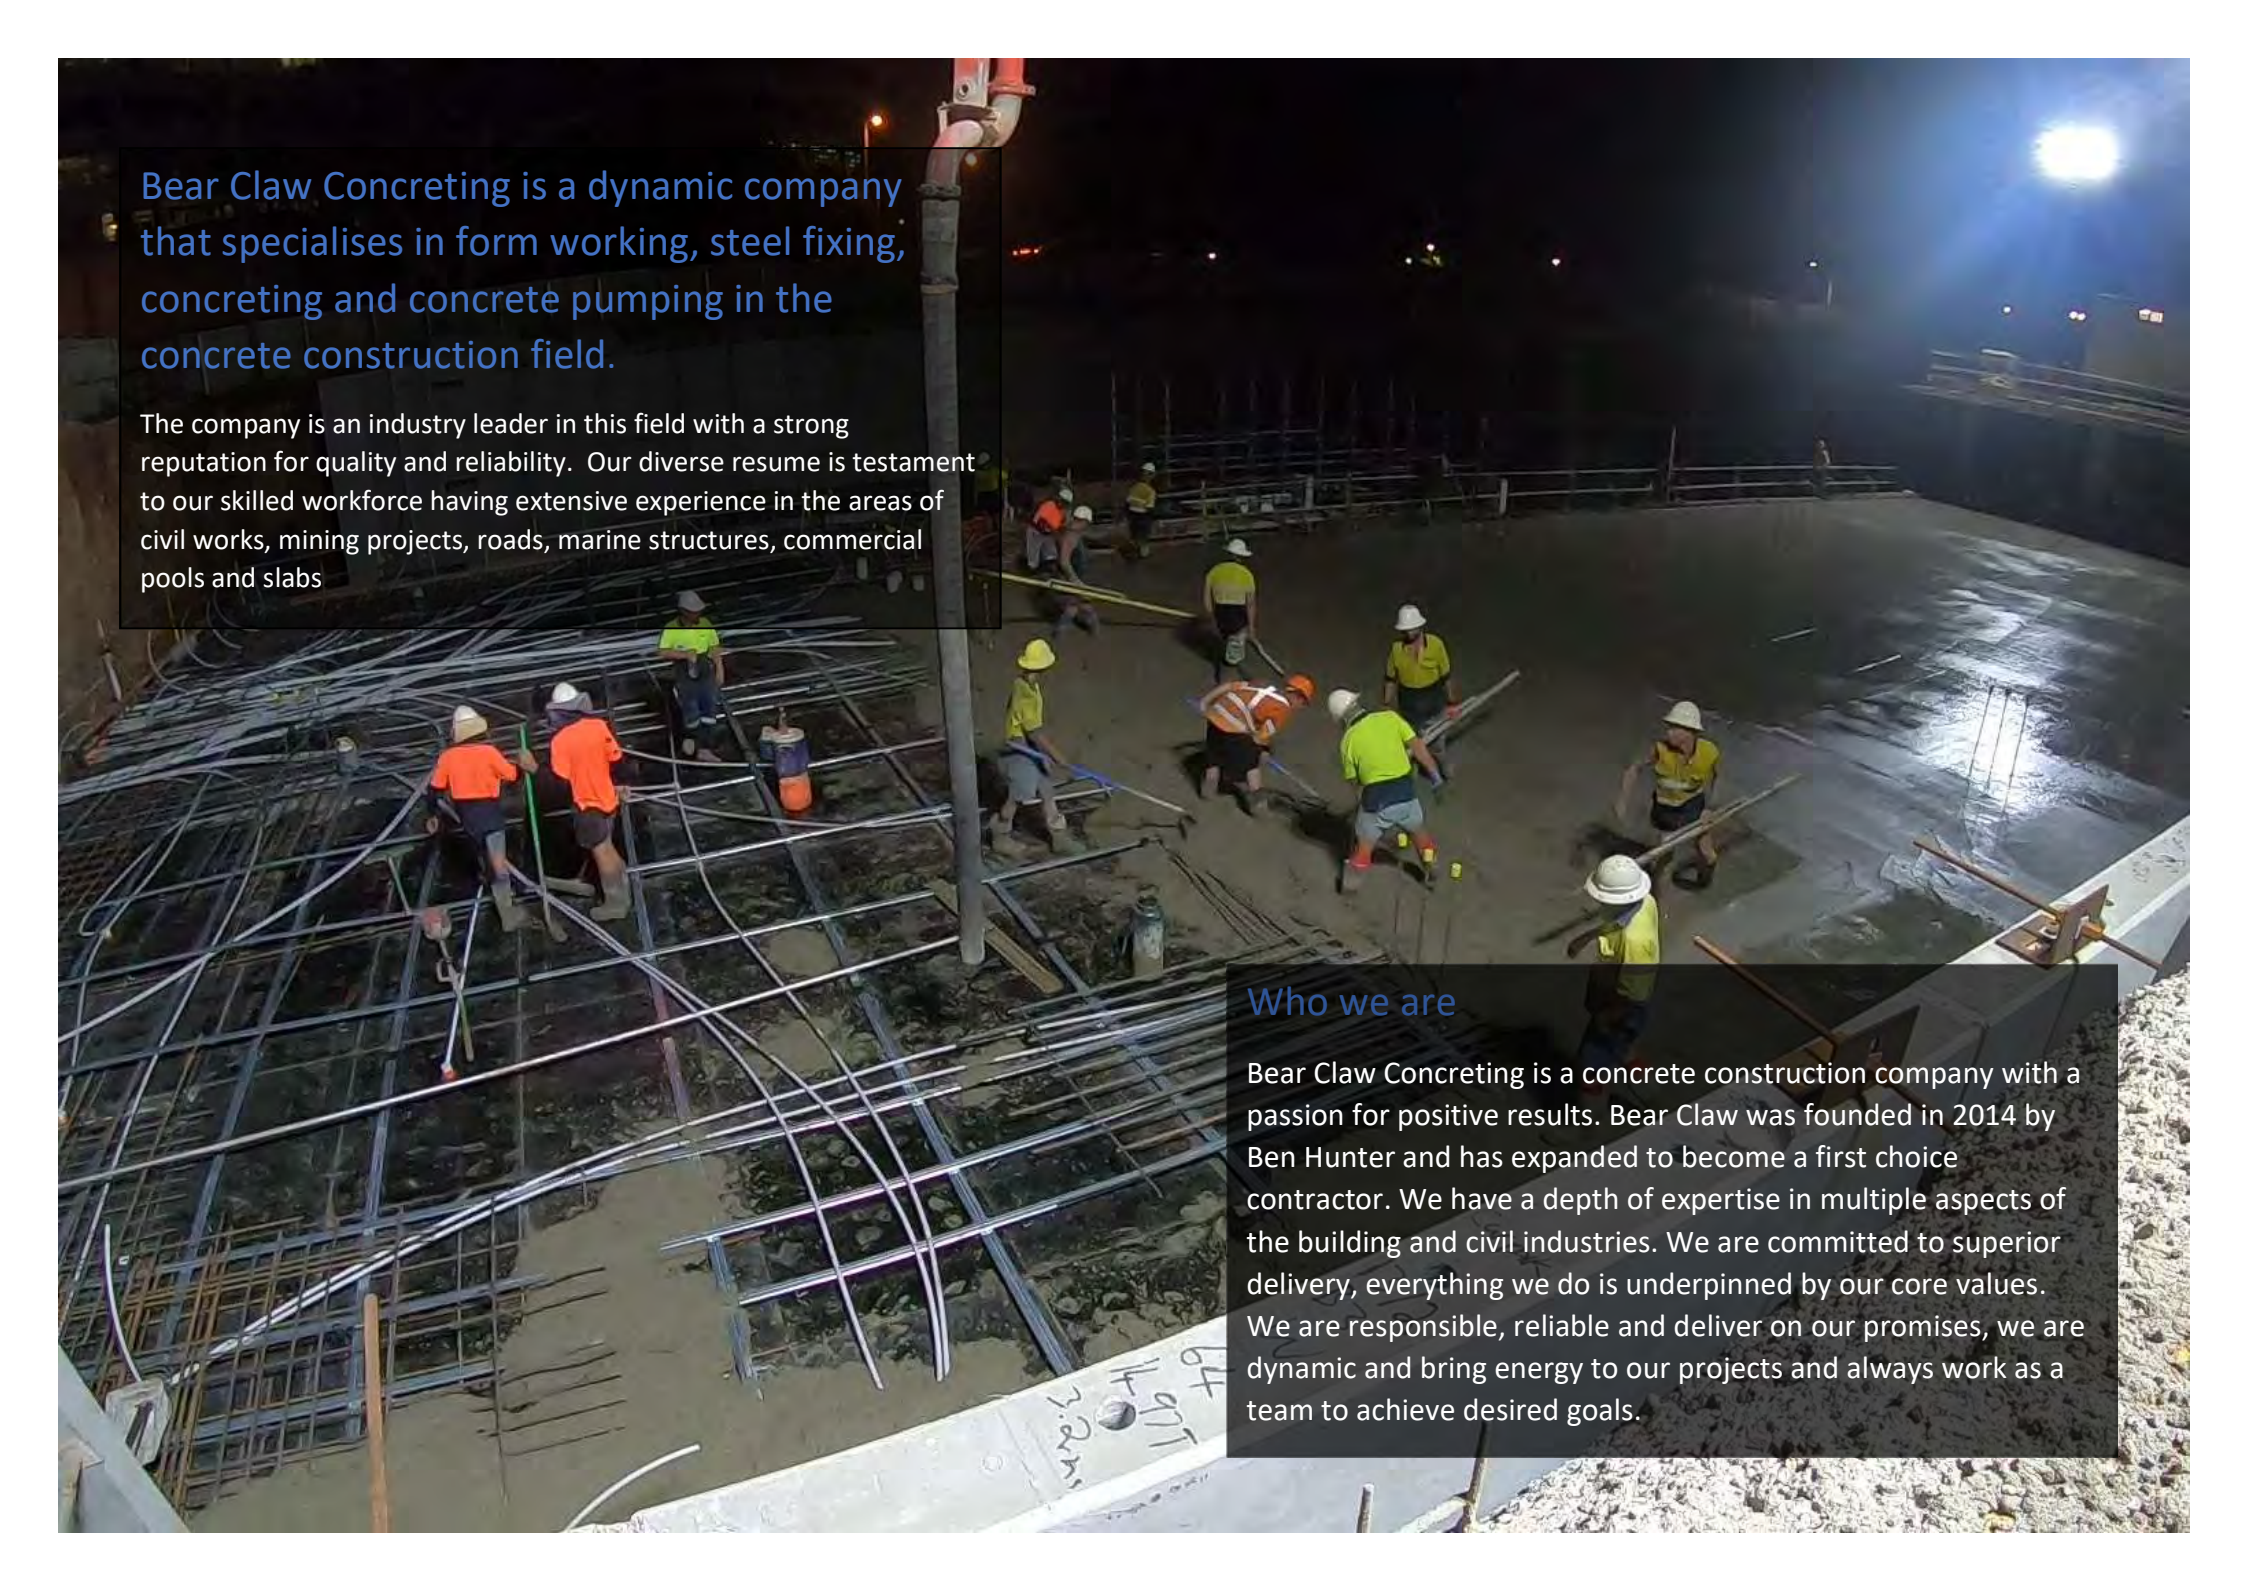

// Safety

// Team Work

// Can do attitude

// Hard work

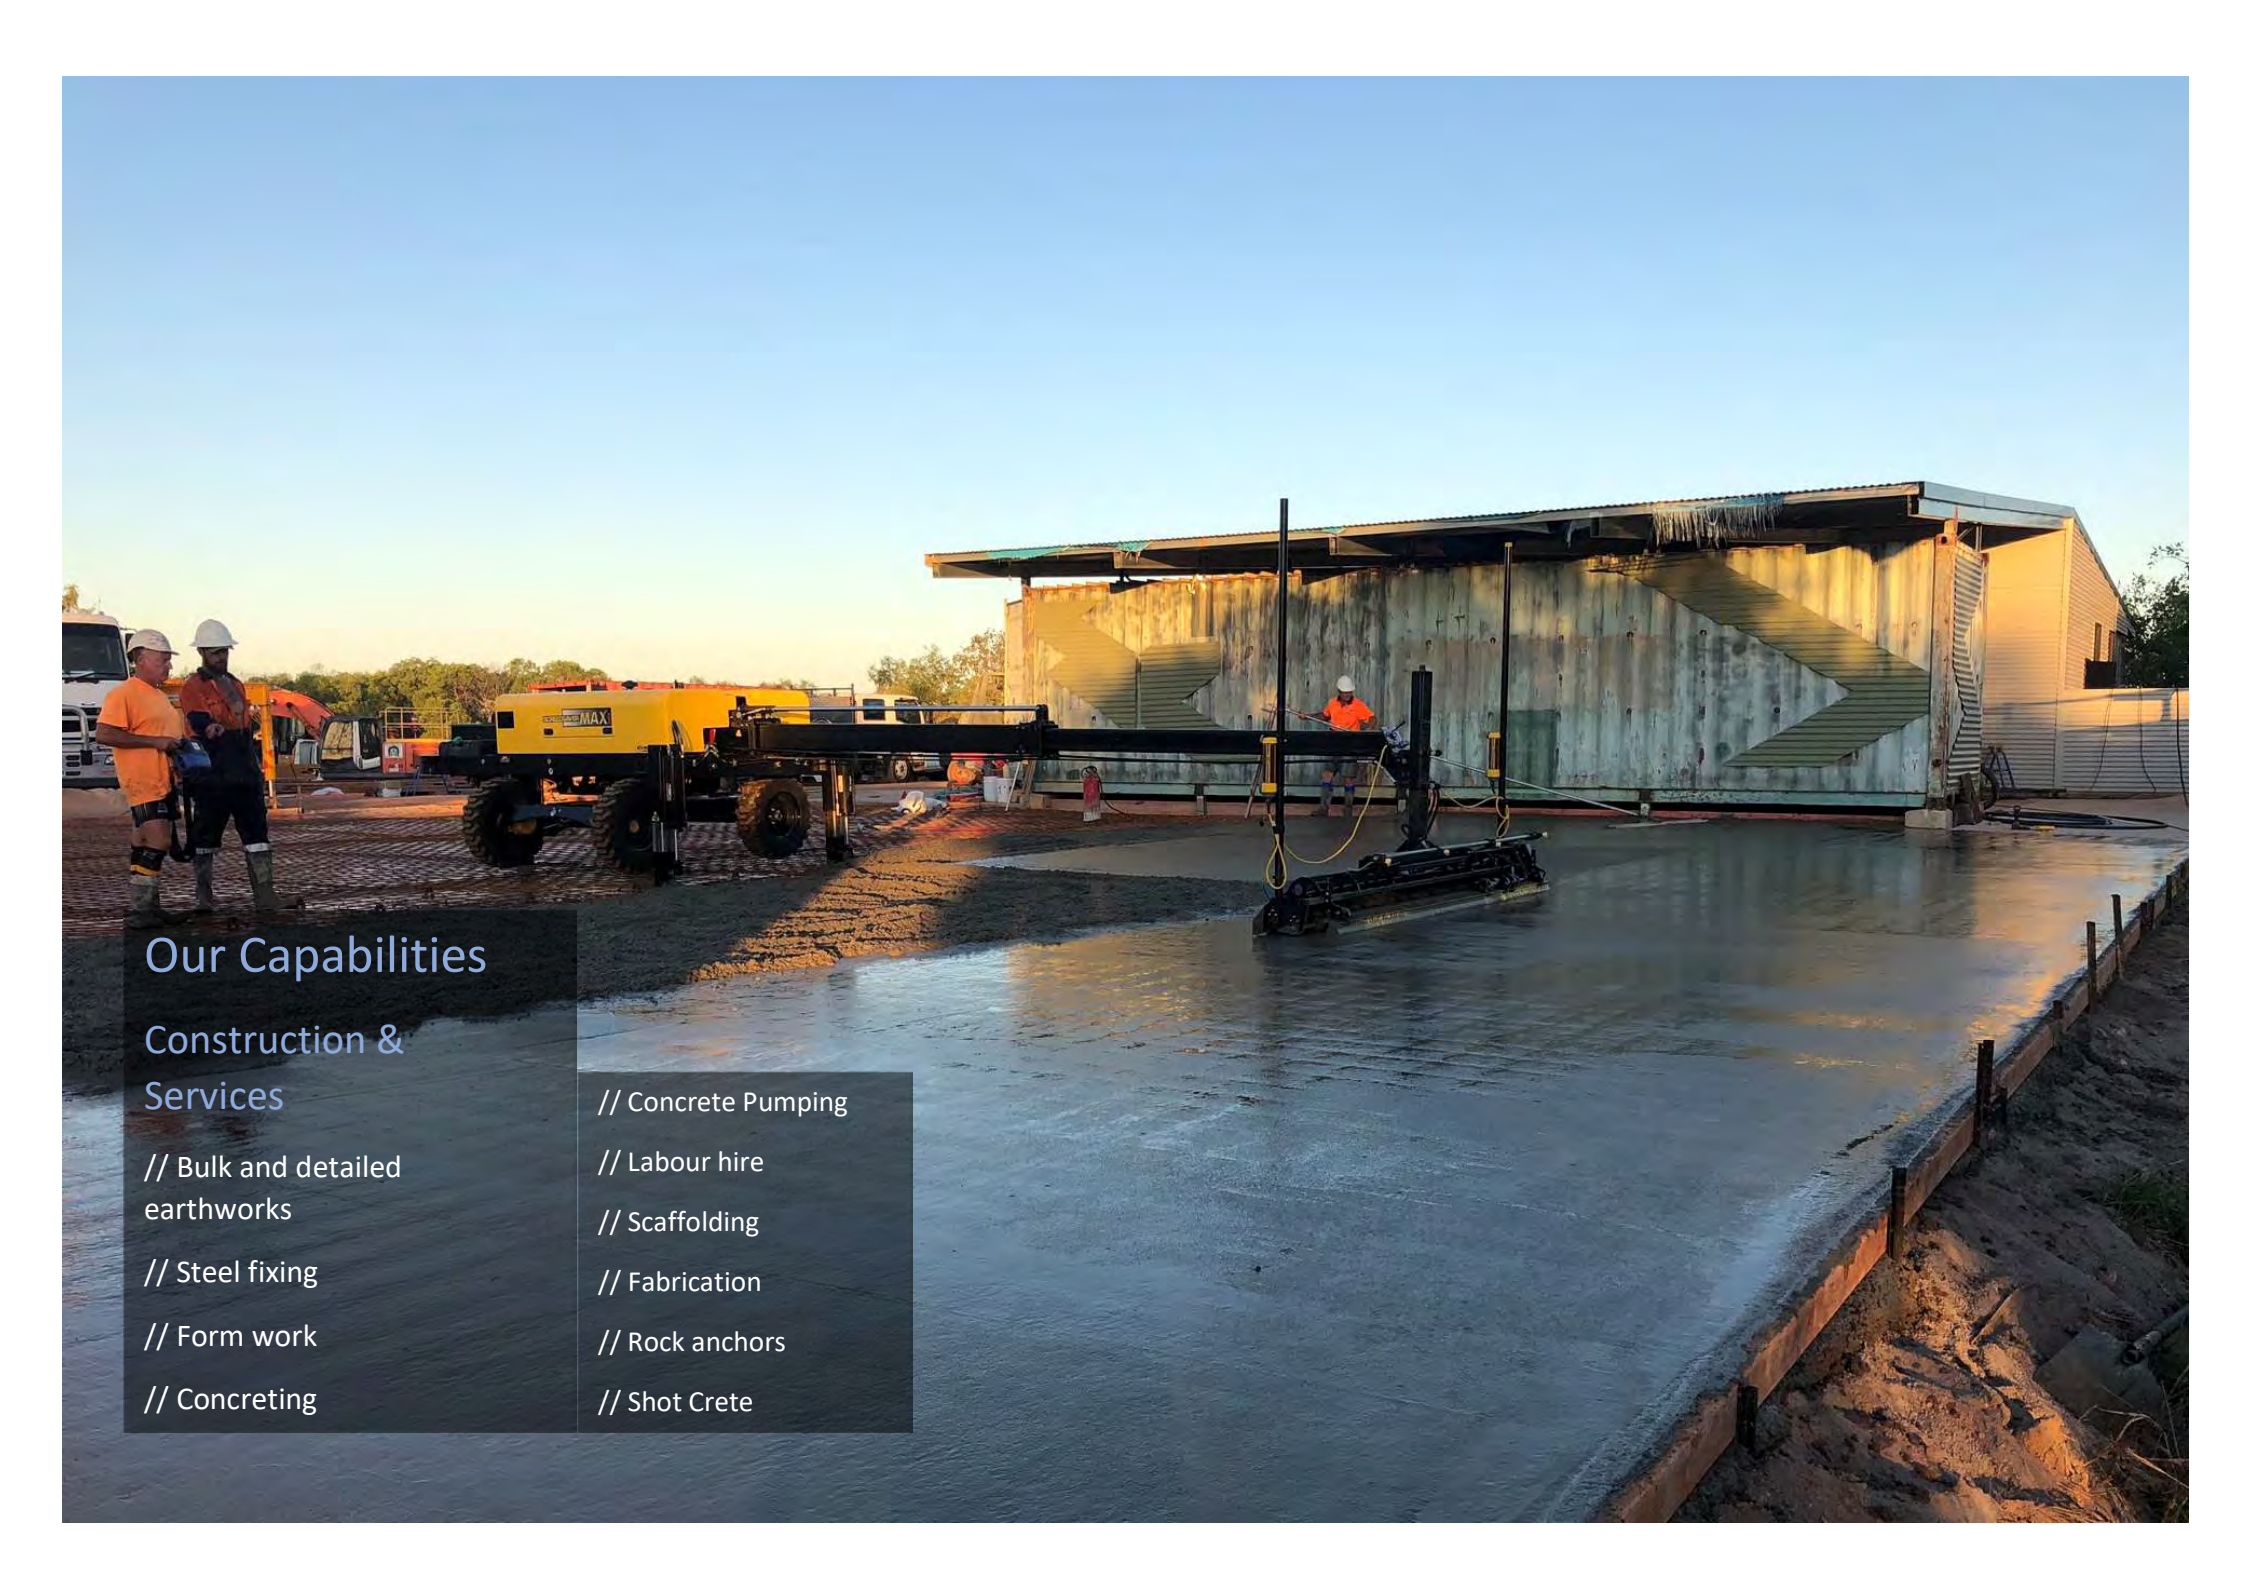

Bear Claw Concreting is a dynamic company that specialises in form working, steel fixing, concreting and concrete pumping in the concrete construction field.

The company is an industry leader in this field with a strong reputation for quality and reliability. Our diverse resume is testament to our skilled workforce having extensive experience in the areas of civil works, mining projects, roads, marine structures, commercial pools and slabs

### Who we are

Bear Claw Concreting is a concrete construction company with a passion for positive results. Bear Claw was founded in 2014 by Ben Hunter and has expanded to become a first choice contractor. We have a depth of expertise in multiple aspects of the building and civil industries. We are committed to superior delivery, everything we do is underpinned by our core values. We are responsible, reliable and deliver on our promises, we are dynamic and bring energy to our projects and always work as a team to achieve desired goals.

A construction site at dusk. In the foreground, a yellow concrete pump truck with a long boom is positioned on a wet, reflective surface. Two workers in orange safety gear and hard hats stand to the left. In the background, a large industrial building with a corrugated metal facade is visible. The sky is a clear, deep blue.
