PROJECT PROFILE

MINOR WORKS CONTRACTS

The Bear Claw workforce is made up of a highly skilled team of workers who possess a wide range of experience in all aspects of Civil and Concrete construction. These traits, together with agility and mobility means that Bear Claw has the capability to undertake a wide range of minor works contracts quickly, efficiently and at low cost.

In this regard, Bear Claw's Civil Division provides quality Civil works to clients including bulk excavation, cut and fill, grading, compaction, surface works and demolition.

In addition to the Civil Division, Bear Claw's Concrete Division specialises in all forms of concrete works from carparks to sports courts; swimming pools to runways; heavy mining equipment structures to aircraft carrier wharf construction and Bear Claw undertakes the entire process! Our capabilities include all the earthworks, laser levelling, form setting, steel placement, pouring, screeding, finishing to low tolerance specifications, saw cutting, bitumen road and carpark construction.

Bear Claw's head office is in Palmerston, with satellite offices in Darwin and Katherine. Their offering includes:

Detailed Excavation – All types of excavations
Cut and Fill – Road Train transport division
Grading and Compaction – UTS and GPS levelling
Formwork – Complex Formwork, Basic Formwork
Reinforcement – Reinforcement Supply, Reinforcement Fixing
Concrete Pumping – Mobile Boom Pumps, Line Pumps
Concrete placing to all types of concrete elements
Concrete Finishing - Ability to offer various concrete finishes
Concrete Panels – Design and construction
